

C5 Firmware Updater

The “C5 Firmware Updater” program is provided for the charger firmware update. The update process can be executed by using the following steps:

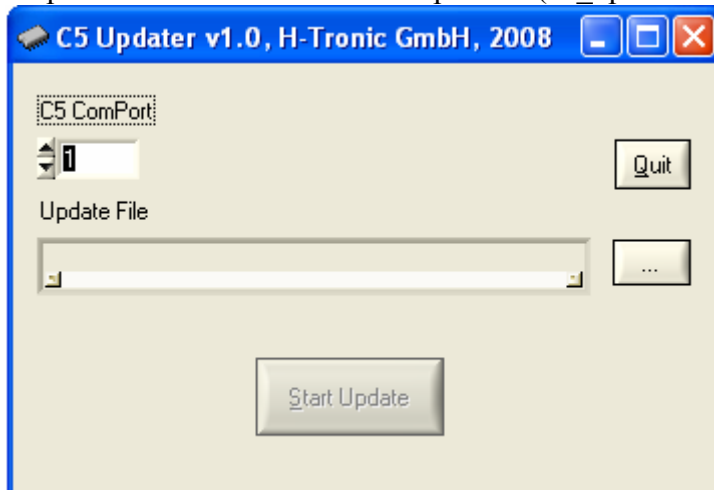

Step 1: The charger must be switched-off.

Step 2: The device joystick must be pushed to the left and held in this position.

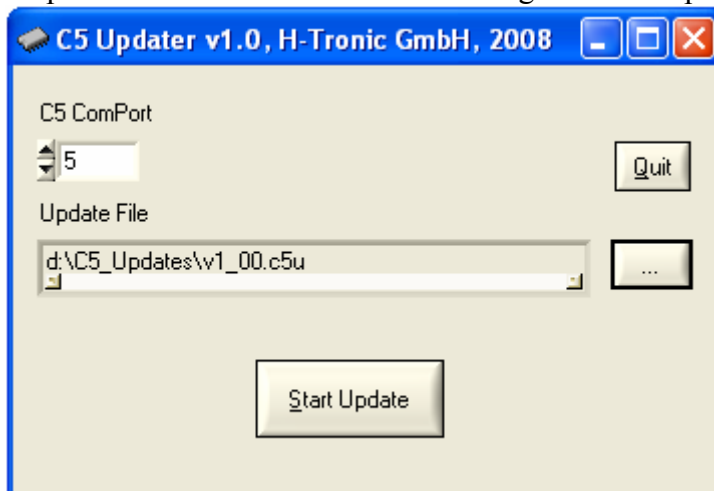

Step 3: Switch on the charger. The following message will appear on the display.

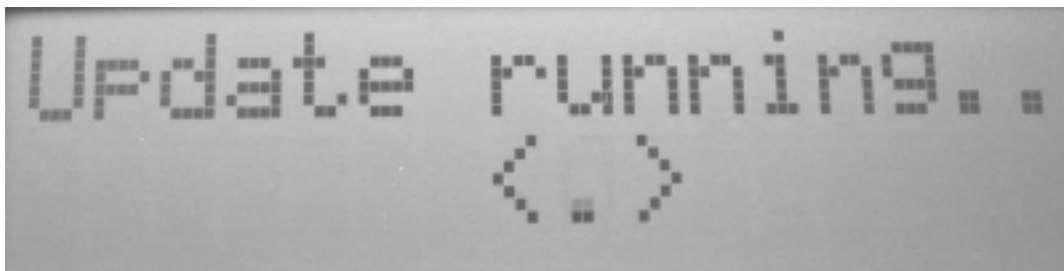

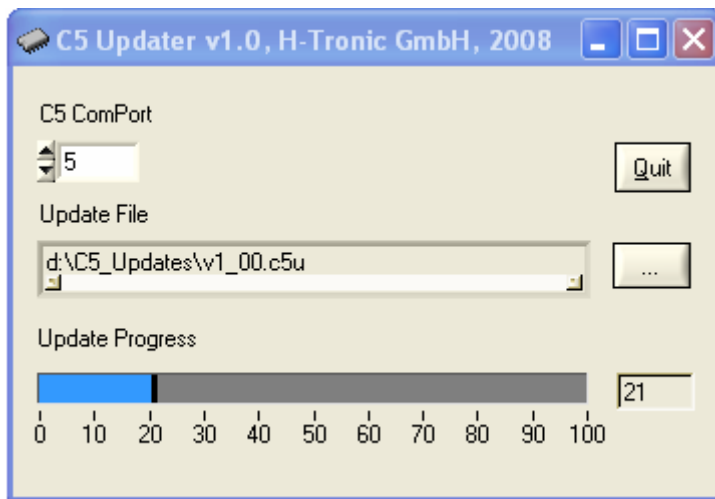

Step 4: Start the “C5 Firmware Updater” (c5_update.exe)

Step 5: Select the COM-Port of the charger and the update file.

Step 6: Start the update.

Step 7: When update is finished, the following messages will appear.
